AI Awareness Quiz - 60 Questions with Answers

Section A - AI Companies & Latest Models

1. ChatGPT is developed by which company?
Ans: OpenAI

2. Claude is developed by which AI company?
Ans: Anthropic

3. Gemini is developed by which company?
Ans: Google (Google DeepMind)

4. Llama models are developed by which company?
Ans: Meta

5. Grok is developed by which company?
Ans: xAI

6. Mistral AI is headquartered in which country?
Ans: France

7. What is the name of OpenAI's flagship GPT-6 frontier model?
Ans: GPT-6 Astra

8. Which OpenAI model is positioned as a lower-cost model with near-Astra intelligence for coding and professional work?
Ans: GPT-6 Sol

9. What is Anthropic's latest Haiku model called as of October 2026?
Ans: Claude Haiku 5.5

10. What is Google's latest flagship Gemini model called as of October 2026?
Ans: Gemini 4 Argon

Section B - Generative AI & LLM Concepts

11. What does LLM stand for?
Ans: Large Language Model

12. What is Generative AI?
Ans: AI that creates new content (text, images, audio, video, code) from what it learned in training data.

13. What is a prompt in Generative AI?
Ans: The input or instruction you give an AI model to get a response.

14. What is a system prompt?
Ans: A hidden instruction set by the developer that defines the model's role, tone and rules before the user chats.

15. What is an AI hallucination?
Ans: When an AI confidently produces false or made-up information.

16. What is a token in an LLM?
Ans: A small chunk of text (a word or part of a word) that the model reads and generates.

17. What does context window mean?
Ans: The maximum amount of text (in tokens) a model can consider at one time.

18. What is inference in AI?
Ans: Using a trained model to generate predictions or outputs from new input.

19. What is fine-tuning?
Ans: Further training a pre-trained model on specific data to specialize it for a task or domain.

20. What does multimodal AI mean?

Ans: AI that can understand and/or generate more than one type of data, such as text, images, audio and video.

Section C - Agents, RAG & Modern AI Development

21. What is an AI agent?

Ans: An AI system that can plan, use tools and take actions on its own to achieve a goal.

22. What is the main difference between a chatbot and an AI agent?

Ans: A chatbot mainly answers questions, while an agent takes actions and completes multi-step tasks using tools.

23. What does RAG stand for?

Ans: Retrieval-Augmented Generation

24. Why is RAG used with LLMs?

Ans: To give the model relevant, up-to-date or private information from external sources, which reduces hallucinations.

25. What is an embedding?

Ans: A numerical vector representation of text, images or other data that captures its meaning.

26. What is a vector database used for in AI applications?

Ans: Storing embeddings and quickly finding the most semantically similar items (for search and RAG).

27. What does tool calling allow an AI model to do?

Ans: Call external functions, APIs or tools (search, calculators, databases) to get data or perform actions.

28. What does MCP stand for in modern AI application development?

Ans: Model Context Protocol

29. What is an API key used for?

Ans: To authenticate and authorize your application's requests to an API (and track usage and billing).

30. What is meant by an agentic workflow?

Ans: A multi-step process where AI agents plan, use tools, check results and iterate to complete a task with little human input.

Section D - AI Image, Video, Audio & Famous Tools

31. Midjourney is mainly famous for generating what type of content?

Ans: AI images and artwork

32. Sora is primarily associated with which type of AI generation?

Ans: Video generation

33. What is the name of OpenAI's current image-generation model family?

Ans: GPT Image (latest version GPT Image 2.5), also called ChatGPT Images

34. What does text-to-image mean?

Ans: Generating an image from a written text description.

35. What does text-to-video mean?

Ans: Generating a video clip from a written text description.

36. What does TTS stand for?

Ans: Text-to-Speech

37. What does STT stand for?

Ans: Speech-to-Text

38. What does OCR do?
Ans: Optical Character Recognition extracts text from images or scanned documents.

39. What is a vision-language model?
Ans: A model that understands both images and text together, such as describing or answering questions about a picture.

40. What is voice cloning in AI?
Ans: Creating a synthetic copy of a person's voice that can speak any text.

Section E - Coding AI, Hardware & Practical Awareness

41. GitHub Copilot is mainly used for what purpose?
Ans: AI-assisted coding: code suggestions, completion and chat inside the editor.

42. Cursor is mainly used for what type of work?
Ans: AI-powered code editing and software development.

43. What is an AI coding assistant?
Ans: A tool that helps write, explain, debug and review code using AI.

44. What hardware component is most commonly used to train large AI models?
Ans: GPU

45. What does GPU stand for?
Ans: Graphics Processing Unit

46. What does NPU stand for?
Ans: Neural Processing Unit

47. What is VRAM mainly used for during AI workloads?
Ans: Holding the model weights and data on the GPU for fast processing.

48. What does running an AI model locally mean?
Ans: Running the model on your own computer or device instead of through a cloud service.

49. What is an open-weight AI model?
Ans: A model whose trained weights are publicly released so anyone can download, run and fine-tune it.

50. What is model distillation?
Ans: Training a smaller "student" model to imitate a larger "teacher" model so it is cheaper and faster.

Section F - Latest AI Awareness & 2026 News

51. Which OpenAI model family includes Astra, Sol and Luna?
Ans: GPT-6

52. Which OpenAI GPT-6 model is designed for the most demanding frontier work?
Ans: GPT-6 Astra

53. Which Claude 5.5 model is positioned for complex agentic coding and knowledge work?
Ans: Claude Opus 5.5

54. Which Claude 5.5 model is designed for fast, high-volume and cost-sensitive work?
Ans: Claude Haiku 5.5

55. What is Google's Gemini 4 flagship model called?
Ans: Gemini 4 Argon

56. What is the name of OpenAI's current model family for advanced image generation and editing?

Ans: GPT Image (GPT Image 2 / 2.5, shown in ChatGPT as ChatGPT Images)

57. What is the name of OpenAI's current realtime voice model family?

Ans: GPT-Realtime (latest: GPT-Realtime-2)

58. Which company develops the Claude Opus, Sonnet and Haiku model families?

Ans: Anthropic

59. What AI safety risk occurs when malicious instructions are hidden inside external content and try to control the model?

Ans: Prompt injection

60. Why should important medical, legal, financial or business information generated by AI be verified by a human?

Ans: Because AI can make mistakes or hallucinate, and wrong information in these areas can cause serious harm.
